MOLECULAR AND NANOMEDICINE RESEARCH UNIT
Organizing
Summer training program on 'Molecular Biological Techniques'

Molecular biological techniques are essential to understand the basic cellular activities at molecular level. Techniques such as, SDS-PAGE, Immunoblotting, Immunoprecipitation and Immunofluorescence are inevitable to study the expression pattern of specific proteins and its localization in the cells/tissues. In order to target the specific proteins inside the cells/tissues, the above mentioned techniques are unavoidable.

In this context, Sathyabama University is organizing one week **Summer training program on – 'Molecular Biological Techniques'** from 2nd to 8th May, 2018. We welcome the participants from the area of Life sciences to learn the basic techniques in Molecular Biology.

Who can attend?

Research Scholars, UG/PG (Life sciences) Students from Universities/Colleges/Research Institutions, R&D Organizations and Industries, interested to learn the molecular biological techniques can apply.

Registration:

- Filled in application form for participation in the **Summer Training Program** should be sent in the attached format with Registration fee of **Rs 5000/-** by DD drawn in favor of "**Sathyabama Institute of Science and Technology**", payable at **Chennai**. Group participants are encouraged to apply for the training program.
- The Registration fee includes kit, shared accommodation in the University Hostel and food during the training program. Certificate will be issued to all the participants.
